

	Company name	Econnect Group Ltd
	Brief company overview	<p>'Energising Renewables' through the electrical connection of renewable energy projects. Based on three business streams of consulting, construction and technology, Econnect has also developed tools to assist the integration of diesel generators and renewable energy generation such as wind and hydro. Econnect's DILC load controllers can provide load levelling for diesel generators, allowing for improved efficiency of generation operation and frequently avoiding the need for installing larger generators.</p>
