

Paper No	Year	Title	Author(s)
S18	1916	The Influence of Sulphur in Liquid Fuels in Internal Combustion Engines (reprint of a report kindly furnished by the Anglo-Mexican Oil Co Ltd and circulated to members February 1915)	by Dr E Graefe
S19	1916	Tars and Tar Oils as Fuel for Diesel Engines	by Charles Day
S20	1916	Oil Engines and Steam Engines in Combination	by Geoffrey Porter
S21	1916	Precautionary Measures to Adopt to Prolong the Life of Diesel Engine Crankshafts	by Philip H Smith
S22	1916	Air Compressor Explosions and Troubles - Report of the Committee	
S23	1916	Piston and Small End Lubrication in Diesel Engines	by Geo B Vickers
S24	1917	Report of Discussion on Paper on Chemistry and Examination of Lubricating Oils, held at a meeting of the Diesel Engine Users Association on 23 February 1917 (paper not available)	
S25	1917	Tar Oil Fuel and Diesel Engines and Report of Discussion	by Geoffrey Porter
S26	1917	Automatic Control of Blast Pressure for Diesel Engines	by Herbert S Russell
S27	1917	The Lubrication of Air Compressors and Diesel Engines	by J Veitch Wilson
S28	1917	Some Notes on the Lubrication of Air Compressors	by Geo W F Horner
S29	1917	The Lubrication of Air Compressors and Diesel Engines. Discussion on the above two papers.	
S30	1918	Notes on Alterations and Re-adjustments carried out on Willans Diesel Engines for using Tar Oils as Fuels without Pilot Ignition and Report of Discussion	by John Milton
S31	1918	Two Essential Conditions for Burning Tar Oil in Diesel Engines	by Philip H Smith
S32	1918	Tar Oil on Diesel Engines	by Harold Moore
S33	1918	The Semi-Diesel Oil Engine Report of Discussion on above Paper at Meetings on 24 October and 28 November	by J Richardson
S34	1919	Definition of Diesel and Semi-Diesel Engines. Discussion at a Meeting of the Association on 6 March 1919.	
S35	1919	Explosion on a Diesel Engine at Wealdstone, and Breakdown of a Diesel Engine at Weymouth	by H S Brackenbury and Geo W F Horner

Paper No	Year	Title	Author(s)
S36	1919	Discussion on the above Report of a Breakdown of a Diesel Engine at Weymouth	
S37	1919	A Method of Checking the Alignment of Diesel Engine Shafts and a Means of Proving if a Shaft is actually Bedding in its Bearings, and Report of Discussion	by Geo Windeler
S38	-		
S39	1920	Obturator and Report of Discussion	by W Fennell
S40	1920	Connecting Rod Bolts, Renewal, Annealing or Heat Treatment. Discussion at Meetings in 1919 and 1920 summarised by Geoffrey Porter	by Geoffrey Porter
S41	1920	The Recovery of Lubricating Oil, and Report of Discussion	by A Wilson
S42	1921	Oil Engine Progress and Report of Discussion	by J L Chaloner
S43	1921	Lubricating Oils for Use in Air Compressors and Report of Discussion	
S44	1921	Wear and Bursting of Cooling Coils in Air Compressors. Discussion at Meeting of the Association.	
S45	1921	The Function of the Heavy Oil Engine in Conjunction with the General Supply of Electricity and Report of Discussion	by Geoffrey Porter
S46	1921	Some Recent Developments in Mechanical Injection Oil Engines using Heavy Oils and Report of Discussion	by Oswald Wans
S47	1922	Mechanical Lubricators and Report of Discussion	by Aubrey B Smith
S48	1922	Some Characteristics of Petroleum Oils Used on Diesel Engines and Report of Discussion	by Harold Moore
S49	1922	Marine Diesel Engines and Report of Discussion	by H F P Purday
S50	1922	Care and Maintenance of Diesel Engines and Report of Discussion	by G E Windeler
S51	1923	Report on Heavy-Oil Engine Working Costs and Report of Discussion	
S52	1923	The Use of Cooling Water for Diesel Engines and Report of Discussion	by J G Griffin
S53	1923	Losses in Heat Engines and Means of Reducing them and Report of Discussion	by Engr Cmdr W P Sillince
S54	1923	Comparative Running Costs of Steam and Diesel Driven Pumping Plants and Report of Discussion	by K B Woodd Smith and T D Key

<i>Paper No</i>	<i>Year</i>	<i>Title</i>	<i>Author(s)</i>
S55	1923	Report on a Broken Crankshaft on a Diesel Engine at Bridgetown, Barbados, and Report of Discussion	by W C Shettle
S56	1923	Some Considerations affecting the Choice of a Heavy-Oil Engine and Report of Discussion	by Geoffrey Porter
S57	-		
S58	1924	Report on Heavy-Oil Engine Working Costs (1922-23) and Report of Discussion	
S59	1924	Heavy-Oil Engine Indicator Diagrams and Report of Discussion	by J M Ferguson
S60	1924	Electricity Supply in War Time, as affected by the Improvements of Heavy Oil Engines, and Report of Discussion	by A H Dykes and W T Townend
S61	1924	The significance of Exhaust Temperature and Report of Discussion	by Philip H Smith
S62	1924	Report on Heavy-Oil Engine Working Costs (1923-24) and Report of Discussion	
S63	1925	Submarine Engines and High Speed Heavy-Oil Engine Electric Generating Sets, and Report of Discussion	by P A Holliday
S64	1925	Recent Oil Engine Developments, and Report of Discussion	by J L Chaloner
S65	1925	Pyrometry of Exhaust Temperatures of Internal Combustion Engines and Report of Discussion	by C E Foster
S66	1925	Some Notes on the Working of the Ruston Mechanical Injection Oil Engine and Report of Discussion	by C O Milton
S67	1925	The Scottish Shale Oil Industry. A Historical Survey and Report of Discussion.	by Edwin M Bailey
S68	1925	Report on Heavy-Oil Engine Working Costs (1924-25) - 1926 Secretarial Statement	
S69	1926	Heavy-Oil Engine Installations - Choice of Site and Lay-Out of Plant	by G Porter
S70	1926	Industrial Tests of Internal Combustion Engines	by W A Tookey
S71	1926	Specifications for Lubricating Oils for Use on Heavy-Oil Engines Do. Supplement	
S72	1926	Some Deleterious Properties of Lubricating Oils	by J E Hackford

Paper No	Year	Title	Author(s)
S73	1926	A Note upon the obligation of the Iron-founder to Diesel Engine Users	by H J Young
S74	1926	Report on Heavy-Oil Engine Working Costs (1925-26)	
S75	1926	Modern Air Compressor Practice in Engine Installations - 1927 Secretarial Statement	by R L Quertier
S76	1927	Report of Proceedings at February Meeting (a) Address by the President, Geoffrey Porter (b) Repair of Diesel Engine Crankshaft at Karachi (c) Compressed Air Receivers - Proposed Regulations under the Factories (No 2) Bill (d) Discussion on Heavy-Oil Engine Costs, 1925-26	
S77	1927	High-Revolution Oil Engines	by P A Holliday
S78	1927	Further Developments in Mechanical Injection Oil Engines	by O Wans
S79	1927	An Outline of Oil Engine Development for Aircraft (a paper prepared for the Oil Power National Conference) Consumers' Oil Tests	by Roswell H Ward by A F Evans
S80	1927	Some Fuel Experiments in a Mechanical Injection Oil Engine	by E L Bass
S81	1927	The Repair of a Diesel Engine Crankshaft by Welding	by A F McAskill
S82	1927	Centrifugal Castings for Diesel Engines Large Diesel Engines for Electricity Works (article from "Engineering Progress")	by J E Hurst
S83	1928	Report on Heavy-Oil Engine Working Costs (1926-27)	
S84	1928	Liquid Fuel from Coal by David Brownlie	
S85	1928	Some Considerations regarding the Peak-Load Problem and High-Powered Peak-Load Diesel Engines	by M Gercke
S86	1928	Marine Oil Engines	by Sterry B Freeman
S87	1928	Report on Heavy-Oil Engine Working Costs (1927-28)	
S88	1929	Some Notes on High-Speed Oil Engines and Report of Discussion	by H O Farmer
S89	1929	Repairs to Diesel Engine Parts by Electro-Deposition and Report of Discussion	by C H Faris
S90	1929	Indicating Oil Engines and Report of Discussion	by Gerald B Fox
S91	1929	Modern Engineering Cast Irons and their Properties and Report of Discussion	by J G Pearce

Paper No	Year	Title	Author(s)
S92	1929	A Form of Coupling for Geared Diesel Engines for Land and Marine Purposes, and Report of Discussion	by W Brose
S93	1930	High Powered Oil Engines for Land Purposes	by W S Burn
S94	1930	Report on Heavy-Oil Engine Working Costs (1928-29)	
S95	1930	The High-Speed Diesel Engine	by H R Ricardo
S96	1930	High Power Heavy Duty Oil Engines. by G A Mellor Development and Experiences.	
	1930	Progress in the Application of the Diesel or Heavy-Oil Engine to Road Transport - 1930 Stationary High Powered Internal Combustion Engines for Electric Generation	by Major W H Goddard by M Gercke, MAN Co, Ausberg
S98	1930	Waste Heat Recovery from Internal Combustion Engines, with Particular Reference to Marine Oil Engines	by Major W Gregson
S99	1931	Report on Heavy-Oil Engine Working Costs (1929-30)	
S100	1931	The Development of the Multi-Cylinder Horizontal Oil Engine	by A Cyril Yeates
S101	1931	Injection, Ignition, and Combustion in High-Speed Heavy-Oil Engines	by S J Davies and E Giffen
S102	1931	Coal: Smokeless Fuel and Oil from the National Standpoint	by Dr W R Ormandy
S103	1931	The Elimination of Vibration	by R B Grey
S104	1931	Notes on the Overseas Operation of Stationary Heavy-Oil Engines	by H V Stead
S105	1931	Heavy-Oil Engines for Waterworks and other Pumping Plant - 1931 Report on 6-Cylinder 1200 BHP Super-charged Ruston Vertical Airless-Injection Oil Engine at Grantham for Ruston & Hornsby Ltd, Lincoln	by C W Casse by W A Tookey
S106	1932	The Heavy-Oil Engine in 1931 J Hope Harrison (Retired)	by Engineer Rear-Admiral
S107	1932	Report on Heavy-Oil Engine Working Costs (1930-31) and Report of Discussion	
S108	1932	Some Problems Connected with High-Speed Compression-Ignition Engine Development and Report of Discussion	by C B Dicksee
S109	1932	Cylinder Liner Wear and Report of Discussion	by Engineer Rear-Admiral J Hope Harrison (Retired)
S110	1932	Steel Frames for Diesel Engines and Report of Discussion	by C H Stevens

Paper No	Year	Title	Author(s)
S111	1932	The Rating of Diesel and other Engines and Report of Discussion	by W A Tookey
S112	1932	Report on Heavy-Oil Engine Working Costs (1931-32) and Report of Discussion	
S113	1933	Small Marine Diesel Engines and Report of Discussion Some Notes and Observations on Petrol and Diesel Engines and Report of Discussion	by O Wans by H R Ricardo
S114	1933	Fuel Characteristics in Relation to Pump and Sprayer Action and Report of Discussion	by L J le Mesurier and R Stansfield
S115	1933	The Vibrations of Oil Engines and Report of Discussion Quarterly Bulletin, October 1933, No. 4, and Report on the Oil Engine in 1932	by P Jackson compiled by Engineer Rear-Admiral J Hope Harrison (Retired)
S116	1933	The Treatment of Cooling Water for Diesel Engines and Report of Discussion	by L O Newton
S117	1933	The Examination, Testing and Maintenance of Air Containers for Diesel Engines, Informal Discussion	
S118	1933	Repairs to Oil Engine Parts by Welding, Informal Discussion	
S119	1934	Report on Heavy-Oil Engine Working Costs (1932-33) and Report of Discussion	
S120	1934	Piston Material and Design and Report of Discussion Causes of Detonation in Petrol and Diesel Engines and Report of Discussion Some Observations on Fuel for Heavy Oil Engines and Report of Discussion	by H J Maybrey by G D Boerlage and Dr W J D Van Dyck by L J le Mesurier and (read R Stansfield before the Institute of Marine Engineers)
S121	1934	Some New Developments in High-Speed Oil Engines and Report of Discussion	by P Belyavin
S122	1934	Heavy-Oil Engine Performances as Recorded on Log Sheets and Report of Discussion	by W A Tookey
S123	1934	The Development and Progress of the High-Speed Diesel Engine in Road Transport and Report of Discussion	by Major W H Goddard
S124	1935	Report on Heavy-Oil Engine Working Costs (1933-34) and Report of Discussion	
S125	1935	The Diesel Engine for Waterworks Use in China, and Report of Discussion	by H Stringer
S126	1935	Informal Discussion on Fuels for Diesel Engines	
S127	1935	Informal Discussion on Modern Methods of Indicating High-Speed Engines	

Paper No	Year	Title	Author(s)
S128	1935	Informal Discussion on High-Speed Diesel Engines	
S129	1936	Report on Heavy-Oil Engine Working Costs (1934-35) and Report of Discussion	
S130	1936	Informal Discussion on the Horizontal versus the Vertical Oil Engine	
S131	1936	Diesel Engine Combustion Research and Report of Discussion	by A Freeman Sanders
S132	1936	The Present Position of Special Steels for the Heavy Oil Engine and Report of Discussion	by S F Dorey
S133	1936	The Application of Diesel Engines to Rail Traction and Report of Discussion	by T Hornbuckle
S134	1936	The Treatment of Fuel and Lubricating Oil: Filtration and Renovation and Report of Discussion	by A Beale
S135	1937	Report on Heavy-Oil Engine Working Costs (1935-36) and Report of Discussion	
S136	1937	The Operation and Maintenance of Marine Diesel Engines and Report of Discussion	by Sterry B Freeman
S137	1937	Improvements in the Economy and Output of Heavy Oil Engines and Report of Discussion	by J Calderwood
S138	1937	Bulletin 1936 and Report of Discussion The Design of Elastically-Supported Foundations for Reciprocating Engines and Report of Discussion	by Dr-Ing Kurt Klopstock
S140	1937	Some Notes on the Performance of Piston Rings in Relation to Medium Speed Diesel Engines and Report of Discussion	by F C Caistor
S141	1937	Diesel Influence on Road Transport Costs. Past Achievements, Present Position and Future Prospects and Report of Discussion.	by P M Sanders and E K Wenlock
S142	1938	Report on Heavy-Oil Engine Working Costs (1936-37) and Report of Discussion	
S143	1938	Supercharging of the Compression Ignition Engine for Road Vehicles and Report of Discussion	by Laurence Pomeroy, Jnr
S144	1938	An Informal Discussion on Bearing Metals	
S145	1938	Bulletin 1937 and Report of Discussion	
S146	1938	The Maintenance of Diesel Plant at the Stations of the British Broadcasting Corporation and Report of Discussion	by L Hotine and P H Smith

Paper No	Year	Title	Author(s)
S147	1938	Diesel Engines and the World's Fuel Supply and Report of Discussion	by J J Broeze and J O Hinze
S148	1938	Symposium on the Starting of Diesel Engines and Report of Discussion	
S149	1939	Report on Heavy-Oil Engine Working Costs (1937-38) and Report on Discussion	
S150	1939	The Design and Construction of Alternators for Coupling to Diesel Engines and Report on Discussion	by F Fitchett and W R Holland
S151	1939	The Utilisation of Waste Heat from Diesel Engines and Report of Discussion	by H J Fountain
S152	1939	Bulletin 1938 and Report of Discussion	
S153	1939	Presidential Address	by George E Windeler
S154	1939	Symposium on Running Gear for Diesel Engines and Report of Discussion	
S155	1939	Springs for Large Diesel Engines and Report of Discussion	by C E Squire
S156	1939	Overseas Operation: Maintenance of Heavy Oil Engines in West Africa and Report of Discussion	by H J P Hopkins
S157-160	-		
S161	1941	The Dual-Fuel Engine	by J Jones
S162	1941	Symposium on Fuel Oil Injection Equipment	
S163	1941	Report of Home Fuels Sub-Committee on the Possibilities of Providing and Utilising Home-Produced Fuels for Diesel Engines	
S164	1941	The Railway Oil Engine	by Brian Reed

Volume 2 No 3 June 1998	P504	Working Cost & Operational Report Stationary Engines & Gas Turbines 1997	Compiled by J H Blowes, IDGTE	
Volume 2 No 4 July 1998	P505	Turbines & Reciprocating Engines Producing Power from Natural Gas Pressure Reductions in the Supply System	by	A Cleveland of Cleveland Eng Services Ltd & E A Wright of WFL Eng & Management Services Ltd

Volume 2 No 5 October 1998	P506	Stirling Engine Powered Micro Co-Generation	by	J Harrison of Sigma Elektroteknisk
	P507	The Diesel Gas Engine	by	Dr T A Bradshaw of Bradshaw Consultants
Volume 3 No 1 January 1999	P508	Gasification of Refinery Residual Oil & Subsequent Generation of Electricity	by	J A G Brown of Progressive Energy & J Griffiths of Jacobs Engineering Ltd
		Biogas on the Farm	by	P Berridge of Ballyhannon Farms Co Wexford, Ireland
Volume 3 No 2 April 1999	P509	Waste heat to water	by	N Pearce of Alfa Laval Ltd
Volume 3 No 3 June 1999	P510	Working Cost & Operational Report Stationary Engines & Gas Turbines 1998	Compiled by J H Blowes, IDGTE	
Volume 3 No 4 July 1999	P511	The phased development and implementation of a large cogeneration plant	by	S A Jameson, P R Gledhill & P Bayada of National Power
		Engine Designs	by	J Blowes & D Gillespie
Volume 3 No 5 October 1999	P512	The Industrial Trent Gas Turbine	by	J M Hutchinson of Rolls-Royce Industrial & Marine Gas Turbines
	P513	New, long life, self cleaning lube oil filtration for diesel engines	by	R Andrews of Cummins Engine Co
Volume 4 No 1 January 2000	P514	Application of computer systems in the improvement of power generation operation and maintenance management	by	R J Hunt of Power + Energy Associates
Volume 4 No 2 April 2000	P515	Four stroke marine diesel engines	by	G P Baecker of MaK (London) Ltd
		Anatomy of a modern diesel engine Part 1	by	G Murray
Volume 4 No 3 June 2000	P516	Working Cost & Operational Report Stationary Engines & Gas Turbines 1999	Compiled by J H Blowes, IDGTE	
Volume 4 No 4 July 2000	P517	Managing lubricating oils in service to optimise life & minimise cost	by	J A Platt of Castrol UK Ltd
		Anatomy of a modern diesel engine Part 2	by	G Murray

Volume 4 No 5 October 2000	P518	Diesel engines and gas turbines in cruise vessel propulsion	by	H W Koehler of MAN B&W Diesel
	P519	The H.A.M. system: a simple way to reduce nox emissions in diesel engines all sizes	by	L-O Olsson of Munters Euroform GmbH
		Anatomy of a modern diesel engine Part 3	by	G Murray
Volume 5 No 1 January 2001	P520	Economic considerations of power plant refurbishment versus new build	by	J H Blowes of Diesel Consult
		The challenges to supplier and user in the coming decade (Ship Propulsion Systems Conference 2000)	by	D A Gillespie, IDGTE
Volume 5 No 2 April 2001	P521	Diesel Particulate Filter Regeneration and Catalytic Nox Reduction Augmented with Heat Recovery and Active Hydrocarbon Injection	by	Krishnan Balakrishna, Marc D Rumminger, Dave T Eveland & Bradley L Edgar of Ceryx Inc
	CP001	Treating fuels in the new millennium	by	Richard Kelly of Alfa Laval Ltd
Volume 5 No 3 June 2001	P522	Working Cost & Operational Report Stationary Engines & Gas Turbines 2000	Compiled by	J H Blowes, IDGTE
Volume 5 No 4 July 2001	P523	A Sustainable Energy Strategy for Wessex Water	by	David Andrews of Wessex Water
Volume 5 No 5 October 2001	P524	Oil mist detection as an aid to monitoring engine condition	by	Brian J Smith of QMI Ltd
	P525	Gas turbines and spark ignition gas engines for industrial CHP	by	Charles C Heap of CCH Consulting
Volume 6 No 1 January 2002	P526	Remote monitoring of large diesel engines	by	Roy Toyne of MAN B&W Diesel Ltd Regulateurs Europa
Volume 6 No 2 March 2002	P527	International marine exhaust emission Legislation	by	A A Wright of American Bureau of Shipping
Volume 6 No 3 June 2002	P528	Working Cost and Operational Report Stationary Engines & Gas Turbines 2001	Compiled by	J H Blowes, IDGTE
Volume 6 No 4 July 2002	P529	Wartsila 64 the biggest and most powerful four stroke diesel engine	by	P Tonon of Wartsila Italia S.p.A.
Volume 6 No 5 September 2002	P530	Development of the Caterpillar GCM34 spark ignition gas engine	by	D Mooser of Caterpillar (MaK)

Volume 6 No 6 November 2002	P531	The Turbec microturbine, from prototype to commercial product	by	S Ernebrant of Turbec
Volume 7 No 1 January 2003	P532	Design and development of the new Rolls-Royce Bergen C engine series	by	Lars M Nerheim of Rolls-Royce Marine A/S
Volume 7 No 2 May 2003	P534	Working Cost and Operational Report Stationary Engines & Gas Turbines 2002	Compiled by J H Blowes, IDGTE	
Volume 7 No 3 July 2003	P533	Safety at gas turbine power applications	by	Roger C Santon of Health & Safety Executive
	S218	<i>Historic Paper: Operating experience with a 750 kW gas turbine</i>	by	G B R Feilden
Volume 7 No 4 September 2003	P535	The Cummins QSK78 heavy duty engine	by	Robin J Bremmer of Cummins Engine Company Ltd & Hirofumi Kizawa of Industrial Power Alliance
	P60	<i>Historic Paper: Electricity supply in war time as affected by the improvements in heavy-oil engines</i>	by	A H Dykes & W T Townend
Volume 7 No 5 December 2003	P536	distillate fuel FOCUS	by	Norman Pearce of Alfa Laval Ltd
		<i>Historic Paper: The recovery of lubricating oil</i>	by	Alfred J Wilson
Volume 8 No 1 February 2004	P537	Development of MAN B&W RK280, the most powerful 1,000 rpm engine in the world	by	Dr E R Karimi of MAN B&W Diesel Ltd
		<i>Historic Paper: The function of the heavy oil engine in connection with the general supply of electricity</i>	by	Geoffrey Porter
Volume 8 No 2 May 2004	P540	Working Cost and Operational Report December 2003	Compiled by W T Owen, IDGTE	
		<i>Historic Paper: Report on heavy-oil engine working costs (1922-23)</i>	by	Diesel Engine Users Association
Volume 8 No 3 June 2004	P538	Kipevu 2 Independent Power Project	by	Graham Dilliway of Power-Consult International Ltd
		<i>Historic Paper: Operating experience with gas turbines with particular reference to Beznau Power Station</i>	by	E A Kerez

Volume 8 No 4 September 2004	P539	First prototype of the high-efficiency Isoengine	by	Mike Coney & Claus Linne- mann of RWE Innogy & Kimihiro Sugiura & Takayuki Goto of Mitsui Engineering & Shipbuilding
	P541	The future for liquid biofuels	by	John McNeil of Sittingbourne Analytical Laboratory Ltd
Volume 8 No 5 December 2004	P542	Design and development of the Rolls- Royce Bergen BV - G lean burn gas engine	by	Lars M Nerheim of Rolls- Royce Marine AS, Engines - Bergen
Volume 9 Issue 1 February 2005	P543	Gaz de France Energy - The first LNG carrier of a new generation	by	Barend Thijssen of Wartsila Raisio, Finland
Volume 9 Issue 2 May 2005	P545	Working Cost & Operational Report stationary engines & gas turbines 2004	Compiled by	W T Owen, IDGTE
Volume 9 Issue 3 June 2005	P544	Aeroderivative gas turbines for marine and energy applications	by	Mick Parker of Rolls-Royce
	P546	Hydrogen, heat & power from waste	by	Andy Brown of Progressive Energy Ltd
Volume 9 Issue 4 September 2005	P547	Design & manufacture of high speed industrial engines	by	Ron Bickerton, Independent Consultant
	P548	Developing a secure power supply for an island community	by	Jim Crombie of I.O.M.
Volume 9 Issue 5 December 2005	P549	The Ecotran Rotating Gasifier generating power from waste	by	Peter Stein of Ecotran Energy Ltd
Volume 10 Issue 1 February 2006	P550	An emerging technology – performance by & condition monitoring of diesel engines & gas turbines via acoustic emission measurements		Ryan M Douglas of Heriot-Watt University
		Applications and cost effectiveness of micro-gas turbines	by	Andy Leach of Renewable Power Systems Ltd
Volume 10 Issue 2 May 2006	P551	Working Cost & Operational Report stationary engines & gas turbines 2006	by	J H Blowes & members of the Working Cost Committee
Volume 10 Issue 3 June 2006	P552	Power management systems in gas turbine power stations	by	Roger Haycock, Freelance Engineer & Consultant
Volume 10 Issue 4 September 2006	P553	Utilisation of low BTU gases in spark ignition reciprocating engines - requirements & experiences	by	Martin Schneider of GE Energy-Jenbacher Gas Engines

Volume 10 Issue 5 December 2006 P554	Experiences of Peterborough Power Station during 2005 Overhaul	by	Ken Henderson of Centrica Energy
Volume 11 Issue 1 February 2007 P555	Modern engine control systems for common rail engines, gas engines & dual fuel engines	by	Rob S Arends of Woodward Europe Controls & Fuel Injection Equipment
Volume 11 Issue 2 P557	Operational Report – stationary engines, gas engines & gas turbines with alternative technology interfaces 2007	by	J H Blowes & members of the Operational Report Committee
Volume 11 Issue 3 June 2007	<i>A talk given to the Open University</i> Emergency diesel standby generator's potential contribution to dealing with renewable energy sources intermittency & variability	by	David Andrews of Wessex Water
Volume 11 Issue 4 September 2007 P560	The development of the TD2010 engine concept	by	R A Bickerton of Deutz UK
Volume 11 Issue 5 December 2007 P561	The use of biomass derived fast pyrolysis liquids in power generation: engines & turbines	by	Cordner Peacocke of Conversion & Resource Evaluation Ltd
Volume 12 Issue 1 March 2008 P562	Gaseous and particulate emissions control from stationary engines and turbines	by	Tim J Benstead & Christoph M Heinisch of Johnson Mathey Catalysts
Volume 12 Issue 2 June 2008	Low container ship speed facilitated by versatile ME/ME-C engines	by	MAN Diesel A/S, Copenhagen, Denmark
	The use of di-methyl-ether as alternative fuel in gas turbines for power generation	by	Alva Shortt of Bateman Power and Energy
Volume 12 Issue 3 September 2008 P564	The management of variability and intermittency of electrical power supply	by	Dave Andrews, Consultant
Volume 12 Issue 4 November 2008 P565	Operational Report 2008 The demands of a new running regime for slow-speed diesel engines	by	Tom Woodford, Guernsey Electricity Ltd
Volume 12 Issue 5 December 2008 P566	The power and control systems design for the UK future aircraft carrier	by	Lt Roy Casson, Colin English, Simon Newman and Lt Cmdr Ian Timbrell
Volume 13 Issue 1 March 2009 P567	The Tri-O-Gen Organic Rankine Cycle: Development and perspectives	by	J P van Buijtenen, Tri-O-Gen BV
Volume 13 Issue 2 June 2009 P568	Barking Power Station generator core failure and repair process	by	G Smith Thames Power Services
Volume 13 Issue 3 September 2009 P571	Industry-University collaboration: a case Study between Manx Electricity Authority and Cranfield University	by	Y G Li, P Pilidis and E Tsoutsanis, Cranfield University and M Newby, Manx Electricity Authority
Volume 13 Issue 4 November 2009	Operational Report 2009	by	Tom Woodford, Guernsey Electricity Ltd
Volume 13 Issue 5 December 2009 P572	Product development and test program for aggressive gas engines	by	V Carey, K Tellier, G Delafargue and D Squirrel, ExxonMobil

Volume 14 Issue 1 March 2010	P573	Biomass – going that extra mile!	by	A McMurtrie AIM Energy Ltd
Volume 14 Issue 2 June 2010	P575	Carbon capture and storage - implications for CCGT development	by	K Foy Parsons Brinckerhoff
Volume 14 Issue 3 September/ October 2010	P576	The evolution of gas turbine compressor	by	Russ Gordon, R-MC Recovery Ltd
	P577	An analysis of micro gas turbines for UK domestic combined heat and power	by	A Clay and G D Tansley, School of Engineering and Applied Science, Aston University, Birmingham
Volume 14 Issue 5 December 2010	P578	Dhekelia ICE – a modern fast track low	by	Henrik Abildgaard & Knud Hvidtfeldt Rasmussen, Burmeister & Wain Scandinavian Contract A/S
Volume 15 Issue 1 March 2011	P580	Stationary MAN B&W MC-S engines for biofuel applications	by	Helle Gofredsen, MAN B&W
	P581	Efficient combustion of Glycerol and other low cetane fuels in the diesel engine	by	John McNeil, Aquafuel Research, Kent Science Park
Volume 15 Issue 2 June 2011	P582	The history of the industrial gas turbine: Part 1 The first fifty years 1940-1990	by	Ronald J Hunt, Power + Energy Associates
Volume 15 Issue 3 September 2011	P583	Reducing fuel consumption in the field by continuously measuring fuel quality on electronically fuel injected engines	by	Mr Patrice Flot & Mr Alain Meslati, CMR France and Mr Thierry Delorme, Ecole Centrale Marseille
Volumes 14 & 15 Issue 4 October 2012		Operational Report (combined edition) 2009/2010 Data	by	Tom Woodford, Guernsey Electricity Ltd
Volume 15 Issue 5 December 2011	P584	The propulsion of merchant ships: The case for LNG – the new era?	by	T W Page, Wartsila UK Ltd
Volume 16 Issue 1 March 2012	P586	Protecting critical equipment, reducing operating costs and safeguarding against downtime through on-line oil condition monitoring	by	Dr Stuart Lunt, Kittiwake Developments Ltd, UK
		Technological and economic aspects of two years operation of the biogas cogeneration set at the Warta SA waste treatment plant in Czestochowa, Poland	by	Adam Duzynski, Czestochowa University of Technology, Poland
Volume 16 Issue 2 June 2012	P587	Diesel power for UK rail traction	by	Trevor Owen
		The influence of CO ₂ in fuel on engine Parameters	by	Marcel Skarohlid, Czech Technical University, Prague
Volume 16 Issue 3 September 2012	P588	Addressing the cause of varnishing in gas turbine lubrication systems	by	John Platt, Castrol Power
	P589	Gas processing, side stream alternative use	by	Stefan Falten, Wartsila Finland Oy

Volume 16 Issue 4 December 2012 P590	Implementing improvements to gas turbine air inlet filtration – an operator's perspective	by	Scott Taylor & Stuart Lax, Sembcorp Utilities (UK) Ltd
Volume 17 Issue 1 March 2013 P592	Narowal 213MW diesel combined cycle plant – overview of project from initial concept to commercial operation	by	Brian Kinsella and Stephen O'Gorman, Mott MacDonald Ireland Ltd
Volume 17 Issue 2 June 2013 P593	Ten years hard labour in Mombasa Tsavo Power Company Limited Kipevu 2 diesel power plant	by	Graham Dillway PowerConsult International Hon Fellow IDGTE
Volume 17 Issue 3 September 2013 P595	The SGT-300 Twin-Shaft – the latest addition to the Siemens' industrial gas turbine portfolio	by	Christian Engelbert and Darrell Helas, Siemens Industrial Turbomachinery
Volume 17 Issue 4 December 2013	GE's integrated GTCC and fulfillment of grid code requirements	by	Maxime Buquet, Operability System Integration Leader and Christian Solacolu, Controls & Electrical Consulting Engineer, GE Power & Water
Volume 18 Issue 1 March 2014 P598	Flexible conventional generation plant with full flue gas abatement	by	Peter Grima, Enemalta Corporation, Malta
Volume 18 Issue 2 June 2014 P599	Energy storage in the UK and Republic of Ireland electricity grids	by	Dr Jim Mooney, University of the West of Scotland
Volume 18 Issue 3 September 2014 P600	Extended fuels capability of Siemens' SGT-400 DLE combustion system	by	Brian M Igoe and Andy Stocker, Siemens Industrial Turbomachinery Ltd, Lincoln
Volume 18 Issue 4 December 2014 P601	Fuel flexibility done right	by	MAN Diesel & Turbo
Volume 19 Issue 1 March 2015 P602	Economic evaluation of online washing for a heavy duty gas turbine operation	by	U Igie, P Pilidis, D Giesecke and O Minervino, Cranfield University and P Lambart, R-MC Power Recovery Ltd
Volume 19 Issue 2 June 2015 P604	Adsorption: A simple and cost-effective solution to remove varnish	by	Bryan Holden, C.C. Jensen Ltd and Scott Taylor, Sembcorp Utilities (UK) Ltd
	P603	Optimisation of GT air intake filtration through the implementation of water-removal technologies	by Gianluca de Arcangelis, TT Filtration
Volume 19 Issue 3 September 2015 P606	Efficiency gains by bottoming reciprocating engines with an ORC	by	Thomas Clark, ElectraTherm Inc.
	P605	The diesel cycle verified for methanol Operation	by Helle Gotfredsen, MAN Diesel & Turbo
Volume 19 Issue 4 December 2015 P607	MAN B&W Stationary Engines – Alternative Fuels	by	Helle Gotfredsen, MAN Diesel & Turbo
Volume 20 Issue 1 March 2016 P608	The Life of a CCGT Power Station Engineering Design Life versus The Commercial World	by	Peter Tottman Barking Power Limited
	P609	British Tank Engines of World War I	by Trevor Owen

Volume 20 Issue 2 June 2016	P610	Power augmentation of existing CCGTs and OCGTs by injection of hot compressed air	by	James Macnaghten CEO, Isentropic Ltd
	P611	Gas turbine performance adaptation for an aeroderivative gas turbine engine power station	by	Dr Tomas Alvarez – ENDESA, Dr T Nikolaidis, Dr M Diakostefanis, Dr S Sampath and Prof P Pilidis - Cranfield University U
Volume 20 Issue 3	P612	Hybrid power generation for remote communities and industrial facilities	by	G Cooper & M Sedighy, Hatch
	P613	Flowmaster gas turbine system modeling	by	Sergio Antioquia, Mentor Graphics
Volume 20 Issue 4	P614	Gas turbine air filter system optimization	by	James DiCampli & Jack Pan, GE Power & Water Mark Arsenault, American Air Filter Ltd
	P615	How the latest upgrades of Siemens advanced frame SGT5-4000F gas turbines can support changing market requirements	by	Marc Tertilt, Siemens AG Power and Gas, Large Gas Turbines, Service Frame Development

Paper archive

Listed above are papers presented to the Institution since 1977. These papers are available for purchase in print or as a pdf file at a cost of £9.50 to non-members and free of charge to members.

Working cost reports/Operational reports are available at a cost of £50 to non-members. Paper synopses are available from our web site www.idgte.org.

If you would like to order a paper please contact the IDGTE team at:

The Institution of Diesel and Gas Turbine Engineers,
Bedford Heights,
Manton Lane,
Bedford,
MK41 7PH
England, UK

Tel +44 (0)1234 214340
Fax +44 (0)1234 355493
Email: enquiries@idgte.org

Or can be ordered and paid for on our web site:
